

Joint Stock Company "USBA" Address: Labour, 4, or. Cahul Republic of Moldova, MD-3901 tel: (373 299) 02.07.01, 07.02.17 Vladimir Bondarev Born on July 25th, 1952, in Cahul town Civil engineer, had graduated from Ki-shinau Polytechnic Institute. From 2003 - the general director of «USBA» JSC. In 1995, integrated plant «USBA» was reorganized into a joint-stock company.

Main object of its activity is to provide vine growers of the South of Moldova with concrete posts and espaliers. For the short term, the integrated plant has succeeded in winning the good fame and in organization of effective sales of products. Furthermore, the enterprise has extended its activity. It produces reinforced concrete plates, plates for road pavement, reinforced concrete fundamental blocks and for home construction, decorative ceramic tiles. Enterprise's staff numbers 80 persons, who produce annually products costing 3.5 mln. lei. Raw materials are purchased from Moldavian producers: cement plant in Rib-nita, Soroca and Cosauti quarries. Production of reinforced concrete articles under orders of local population and clients from Ukraine and Romania is arranged. In perspective, «USBA» JSC plans to improve considerably quality of products and bring it to the level of European standards, as well as to produce articles

from plastics, silicate materials and foam concrete. Managerial plans include establishment of business relations with similar enterprises of Europe and from CIS-states. «USBA» is opened for collaboration with new business partners.
