

Joint Stock Company "Metalferos» Address: Railway Street, 1/3, no. Hearth, Chisinau, Republic of Moldova, MD-2055 tel. / fax: (+373 22) 50-91-59 E-mail: info@metalferos.md Victor Ostap Born on October 9th, 1965, in Teleneshti town Mechanical engineer; had graduated from Kishinau Agricultural Institute (1988). From 2002 - director of «Metalferos» JSC. Since ancient times, people use articles made from resistant materials. Machines and equipment, machine tools and mechanisms, as well as many household articles were made from steel and iron. In due course, metal articles were replaced by ones from plastic, whereas some of them became worthless. Unfortunately, part of obsolete equipment turned out to be neglected.

This ownerless trash continues to rust in fields, along roads and in yards, make traffic difficult, spoil the land and disfigure the landscape. In order to stop and avoid this, «Metalferos» Enterprise, which in 2002 became a joint-stock company, had arranged the collection of scrap (useless, morally outdated installations, worn out machines and parts) from population and industrial enterprises. Followings slight processing, more than 100 thousand tons of metal alloys collected every year by «Metalferos» are directed to Ribnita metallurgical works. Besides scrap

collection, workers carry out sorting, disjoining and transportation of iron, alloy and non-ferrous metals articles. Selection and distribution of coming scrap is performed by means of mechanical or electric loaders. From wastes subject to processing, metal screen for fences, grid fences, poles, nails, etc., which are in great demand of residents of the Republic of Moldova, are produced.
